Yesterday we held the first [REDACTED] Officers Briefing which lasted about two hours, from 1500-1700. I met with them for about 10 minutes to explain the briefing plan and then escorted them to DSD/OSI where [REDACTED] briefed them on the ABM problem. We then visited FMSAC where Dave Brandwein and [REDACTED] presented a wrap-up of the past month's missile and space activity and also a discussion on the CHICOM missile activity. The group received a tour of the center before leaving. Their reaction to the entire afternoon was very favorable, and they appreciated the opportunity to receive these briefings.
